

Universal

Disposable wipes with skin neutral detergent

Art.-Nr.: 41153

Art.-Nr.: 41133

Easy, gentle cleaning without the use of protective gloves

Cleaning tasks at home and at work are often difficult when using disposable wipes that require protective gloves. We have therefore developed a new universal wipe with compatible skin ingredients.

The wipes contain surface-active surfactants, which ensure the wipe removes grease and dirt while being gentle on the skin.

Application

Cleaning of all surfaces that can withstand water e.g. tables, sinks, furniture with vinyl and leather upholstery, stove, refrigerator, car dashboards, etc. The wipe is also suitable as a stain remover on textiles and to remove mold from window frames, damp corners and grease from kitchen furniture and equipment.

Clinical use

Avoid the spread of bacteria in patient areas by using our Universal disposable wipes. For example, clean equipment and surfaces close to patient with a wipe. Throw the wipe away and use a new disposable wipe for the next patient.

The cloths are made of a perforated and highly absorbent material that absorbs microorganisms so that they are removed and do not spread during cleaning. At the same time, a rapid drying of the cleaning liquid on the surface is achieved, so that disinfection with alcohol-based disinfectant products can be carried out immediately after cleaning.

Material

65 % Viscose /35 % Polyester.
The wipes are both cross and z-folded so that the wipes can be removed from packages individually folded and ready for use.

CVR/VAT no: DK 30207726

Note

The disposable wipes are produced in two sizes: maxi and mini.

Art. no. 41153: Universal Maxi carton of 12 packets
1 packet contains 20 wipes, 43×30 cm

Art. no. 41133: Universal Mini carton of 20 packets
1 packet contains 25 wipes, 20×30 cm

Content

Acc. to Regulation (EC) No. 648/2004:
Ingredients: <1% surfactant
Preservatives: Sodium Benzoate, Potassium Sorbate
Perfume and colour free contains lactic acid
pH ca. 5.2 (Skin neutral)

Environmental labeling

pH-neutral universal cleaning without allergenic preservatives.
Cleaner and cloths are declared and labeled in collaboration with the Asthma Allergy Nordic.

Country of origin

Produced in Germany under cGMP/ISO 22716

Durability

2-year shelf life. Use up to 30 days after opening

Local workplace requirements must be observed.

Safety Data Sheet submitted on request.

Always read label and product information before use.
