USER GUIDE

TABLE OF CONTENTS

1. IMPORTANT SAFETY INSTRUCTIONS

Please refer to our website: **www.geemarc.com** for an up to date user guide, as there may be important updates and changes you need to be aware of !

Congratulations!

Congratulations on purchasing your **Geemarc AMPLIDECT COMBI 595** telephone. This telephone offers all the advantages of cordless technology (compliant with Digitally Enhanced Cordless Telecommunications- DECT standard) together with an easy to see big button keypad, ideal for those who suffer with poor sight. This telephone is also hearing aid compatible.

It is important that you read the instructions below in order to use your Geemarc telephone to its full potential.

CAUTION: Use only the battery provided. There may be a risk of explosion if a wrong type of battery is used for the parent unit. The battery cannot be subjected to high or low extreme temperature and low air pressure at high altitude during use, storage or transportation. Disposal of battery into fire or a hot oven, or mechanically crushing or cutting or the battery can result in an explosion. Leaving the battery in an extremely high temperature surrounding environment can result in an explosion or the leakage of flammable liquid of gas. Battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas. Dispose of used battery according to the instructions.

Normal operating temperature for the product (e.g. 0 °C ~ 40ºC).

Use only the adapters and battery listed below.

⚠️ 🗉 Power adapter information: (**Base**) output: 6V DC 0.8A, 4.8W. Csec. Model: CS6F060080FGF (EU), CS6F060080FBF (UK)

(**Charger**)output: 6V DC 0.45A, 2.7W. Vtech Telecommunications Limited. Model: VT05EEU06045 (EU), VT05EUK06045 (UK)

⚠️ 🗉 Rechargeable Battery: Model: VT60AAAHC x 3pcs. 1.2V DC, 600mAh. GPI.

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. Read and understand all the instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this product near water (for example, near a bath tub, kitchen sink, swimming pool).
5. Do not expose the telephone to direct sunlight or extreme cold environment. Do not put the telephone close to a heating source such as radiators, cookers, etc.
6. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
7. Unplug this product from the wall outlet and refer servicing to the distributor under the following conditions:
    • When the power supply cord or plug is damaged or frayed.
    • If the product does not operate normally by following the operating instructions.
    • If the product has been dropped and the cabinet has been damaged.
    • If the product exhibits a distinct change in performance.
8. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
9. Do not use the telephone to report a gas leak in the vicinity of the leak.
10. Use only the supplied NiMH (Nickel Metal Hydride) batteries! The operation periods for the handsets are only applicable with the default battery capacities
11. The use of other battery types or non-rechargeable batteries/primary cells can be dangerous. These may cause interference and/or unit damages. The manufacturer will not be held liable for damage arising from such non-compliance.
12. Do not use third party charging bays. The batteries may be damaged.
13. Battery should not be exposed to excessive heat such as bright sunshine or fire and immersed in water.
14. For pluggable equipment, the socket-outlet (power adaptor) shall be installed near the equipment and shall be easily accessible.

Disposal warning

1. When this crossed-out wheeled bin symbol is attached to a product,
   it means the product is covered by the European Directive 2012/19/EU.
2. All electrical and electronic products/battery should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
3. The correct disposal of your old appliance/battery will help prevent potential negative consequences for the environment and human health.

For more detailed information about disposal of your old appliance/battery, please

Contact your city office, waste disposal service or the shop where you purchased the product.

2.   SET UP THE TELEPHONE

2.1   Package Contents

The package contains the following items:

- Base station
- Corded handset
- Cordless handset
- Charger with an AC power adapter
- AC power adapter (for base unit)
- 3X NiMH rechargeable batteries (for handset)
- Telephone line cord (for base unit)
- User's manual

2.2   Location

For maximum coverage and reduce the interference, here are some guidelines you should consider when you place the base unit,

- place it at a convenient, high, and central location with no obstructions between the handset and base unit in an indoor environment.
- place it away from electronic appliances such as televisions, microwave ovens, radios, personal computers, wireless devices or other cordless phones.
- avoid facing radio frequency transmitters, such as external antennas of mobile phone cell stations.
- avoid plugging it into the same circuit as other major household electrical appliances because of the potential for interference. Try moving the appliance or the base unit to another power outlet.

If the reception for a base unit location is not satisfactory, move it to another location for better reception.

Depending on the surrounding conditions as well as spatial and structural factors, the range may be reduced. The range indoors is normally less than outdoors.

2.3   Connect the Corded Base Station

Plug one end of the telephone line cord into a telephone jack or a DSL filter.

If you have DSL high-speed Internet service, a DSL filter (not included) is required.

Route the telephone line cord through this slot.

Click the wall mount bracket securely into the mounting slots for tabletop use.

Plug the other end of the telephone line cord into the telephone jack on the back of the telephone base.
Plug the large end of the telephone base power adapter into a power outlet.

Route the power adapter cord through this slot.

Plug the small end of the telephone base power adapter into the power adapter jack on the back of the telephone base.

Plug the corded handset cord into the corded handset jack on the back of the telephone base.

NOTE
• Use only the power adapter supplied with the base station.

Plug the power adapter into a power outlet.

2.4 Install and Charge the Handset Battery

1. Slide the battery cover downwards Install the 3 batteries into the socket as indicated, matching correct polarity (+, -).

2. Align the cover flat against the battery compartment, and then slide it upwards until it clicks into place.

3. Charge the handset by placing it face forward in the charger. You hear a beep when the handset is charging in the charger.

NOTES

• Use only the supplied NiMH rechargeable battery pack.
• If you do not use the handset for a long time, disconnect and remove the battery to prevent possible leakage.

2.5 First use of your handset

After you have inserted the batteries, the display asks you to select your text language with the keys ▼/▲, press 🔲 to valid.

Then enter the date with the keypad and validate by pressing 🔲.

Then enter the correct hour with the keypad and validate by pressing 🔲.

Then select your talking language with the keys ▼/▲, press 🔲 to valid.

2.6   Base Station Installation options

Your telephone base is ready for tabletop use. If you want to mount your telephone on a wall, follow the steps to connect the telephone base with a standard dual-stud telephone wall mounting plate. You may need a professional to install the mounting plate.
2.6.1   Tabletop to Wall Mount Installation

1. Unplug the power adapter from the power outlet. Unplug the telephone line cord from the wall jack (or DSL filter).

2. Put the corded handset aside. Hold down the switch hook on the telephone base, and then slide the handset tab upwards to remove it from the slot. Rotate the handset tab by 180 degrees. Then, replace the handset tab into the slot until it locks into position.

3. Press down on the tabs of the wall mount bracket to release it from tabletop orientation.

4. Rotate the wall mount bracket down and push it into the telephone base until it clicks into place.

5. Plug the telephone line cord (or DSL filter) into the wall jack. Plug the power adapter into a power outlet. Align the slots on the back of the telephone base with the studs of the wall mounting plate.

6. Slide the telephone base down until it locks securely. Bundle the telephone line cord and power adapter cord neatly with twist ties.
### 2.6.2   Wall Mount to Tabletop Installation

1. Unplug the power adapter from the power outlet. Unplug the telephone line cord from the wall jack (or DSL filter). If the telephone line cord and power adapter cord are bundled, untie them first. Push the telephone base up to remove it from wall.

2. Put the corded handset aside. Hold down the switch hook on the telephone base, and then slide the handset tab upwards to remove it from the slot. Rotate the handset tab by 180 degrees. Then, replace the handset tab into the slot until it locks into position.

3. Gently pull upward to release the wall mount bracket. Rotate the wall mount bracket up to tabletop position and push it into the telephone base until it clicks into place.

4. Plug the telephone line cord (or DSL filter) into the wall jack. Plug the power adapter into an power outlet. Bundle the telephone line cord and power adapter cord neatly with twist ties if necessary.

4. USE YOUR PHONE

4.1 Make an External Call

4.1.1 Preparatory Dialing

Using a handset:

Enter the phone number and press ＼◀)) to dial the number. Press 🔲 to clear the entry.

Using the base:

Enter the phone number and lift the corded handset or press **SPEAKER** ◀)) to dial the number. Press *Int*/⊠/**C** to clear the entry when entering the number.

4.1.2 Direct Dialing

Using a handset:

Press ＼◀)) to take the line, and then enter the phone number.

Using the base:

Lift the corded handset or press **SPEAKER** ◀)) to take the line and enter the phone number.

4.1.3 Call from the Phonebook

Using a handset:

1. Press 📖 to access the phonebook list and press ▲/▼ to select the desired phonebook entry.
2. Press ＼◀)) to dial the selected entry. Press it again to turn on the speakerphone.

Using the base:

Press 📖 **PHONEBOOK** to access the phonebook and press ▲/▼ to select the desired phonebook entry. Lift the corded handset or press **SPEAKER** ◀)) to dial out to the selected phonebook entry.

4.1.4   Call from the incoming Call List

Using a handset:

1.   Press $\boxed{=}$ to enter the main menu.
2.   Press $\boxed{=}$ to enter in call log list
3.   Press ▲/▼ to select the desired call list entry.
4.   Press ➘ ◀⟩) to dial the selected call list entry. Press it again to turn on the speakerphone.

Using the base:

Press ?▲ **CALLS** to access the call list and press ▲/▼ to select the desired call list entry. Lift the corded handset or press **SPEAKER** ◀⟩) to dial out to the selected call list entry.

4.1.5   Call from the Redial List

Using a handset:

1.   Press ⊙̣ to access the redial list.
2.   Press ▲/▼ to select the desired redial number.
3.   Press ➘ ◀⟩) to dial the selected redial number. Press it again to turn on the speakerphone.

Using the base:

1.   Press ⊙̣ to access the redial list
2.   Press ▲/▼ to select the desired redial number.
3.   Lift the corded handset or press **SPEAKER** ◀⟩) to dial out to the selected redial number.

4.1.6   Call Timer

Your handset or base automatically times the duration of each call. The call timer will display a few seconds after the call has ended. It is shown in hours, minutes and seconds format (HH:MM: SS)

4.2   Make a Call from Direct Access Memory

Using the base:

In idle mode, press any direct memory key in which a number is stored, the phone will automatically dial out the telephone number stored in the selected memory key in speakerphone mode.

OR

Lift the corded handset or press **SPEAKER** ◀)), and then press any direct memory key in which a number is stored to dial the number pre-stored into the keys respectively.

NOTES:

•   You need to set the direct access number first. See **Section 7.1** for details.

•   If no number is stored, you will hear beeps.

4.3   Answer a Call

Using a handset:

If the handset is not on the charging cradle:

When the phone rings, press ➘◀)) to answer a call. Press it again to turn on the speakerphone.

If the handset is on the charging cradle: When the phone rings, pick up the handset to answer a call.

Using the base:

When there is an incoming ring, pick up the corded handset or press **SPEAKER** ◀)) to answer the call.

4.4   Volume Boost Function

The Volume Boost function allows you to amplify the handset earpiece volume to compensate for the ear's limited sensitivity.

Using a handset:

To turn on the Volume Boost function:

- Press ![SOS] at any time during a call. "BOOST ON" displays on the handset screen.

- When the Volume Boost function is activated, press ▲/▼ to increase or decrease the earpiece volume.

To turn off the Volume Boost function and return the earpiece volume back to normal:

- Press ![SOS] again and the handset top indicator will turn off.

NOTE:

The audio boost feature will be turned off automatically when the call is ended.

Using the base:

During a call, you can activate the Volume Boost function with the volume of earpiece increased by several dBs by pressing *SOS*/AMPLIFY , "BOOSTER ON" displays on the base screen. To cancel it, press *SOS*/AMPLIFY again.

4.5   End a Call

Using a handset:

During a call, press ![phone] to end the call.

OR

Put the cordless handset on the charging cradle to end the call.

Using the base:

During a call, put the corded handset on the base station to end the call.

OR

Press **SPEAKER** ◀)) if you have a call in speakerphone mode.

4.6   Adjust Earpiece and Speakerphone Volume

There are 6 levels (VOLUME 1 to VOLUME 6) to choose from for each of earpiece and 7 levels for speakerphone volume of the base.

Using a handset: During a call:

Press ▲/▼ to select **volume 1-6 or 7**. The current setting is shown. When you end the call, the setting will remain at the last selected level.

Using the base: During a call:

Press ▲/▼ to select **volume 1-6**. The current setting is shown. When you end the call, the settings will remain at the last selected level.

4.7   Mute a Call

With the call muted, you can talk to someone nearby without letting the caller hear you during a call.

Using a handset: During a call:

Press ⌧ **CANCEL/MUTE** to mute the microphone and "MUTE ON" will be displayed on the handset screen. Your caller cannot hear you. Press ⌧ **CANCEL/MUTE** again to resume the microphone.

Using the base: During a call:

Press *Int*/⌧/**C** to mute the microphone and "MUTE ON" is displayed on the LCD. Your caller cannot hear you. Press *Int*/⌧/**C** again to resume the microphone.

4.8   Modify the tonality during a call
Using a handset: During a call:

Press ♪TONE to increase the high, low frequencies or come back in normal response.

Using the base: During a call:

Press **M4 TONE** to increase the high, low frequencies or come back in normal response.

4.9   Emergency Call without Main Power

The corded base unit can make an emergency call with the corded handset when the mains AC power is disconnected.

Pick up the corded handset and wait for several seconds to get the dial tone and then enter the phone number to make a call.

REMARK:

It is not possible to dial numbers from memories when the mains power is off.

When the mains power is off, you can also answer an incoming call with the corded handset.

When the phone rings, pick up the corded handset to talk to the caller.

4.10   Redial the Last Number

You can redial up to 10 of the last numbers called on the cordless handset or on the corded telephone base. If you have stored a name in the phonebook to match with the number, the name will be displayed instead. The most recently dialed number will be displayed at the top of the redial list.

4.10.1   Redial a Number from the Redial List

Using a handset:

1.   In idle mode, press ⬤ to access the redial list.
2.   Press ▲/▼ to browse the redial list.
3.   Press 📞 ◀) to dial the selected redial number.

NOTE:

If there is no number in the redial list, the display will show "EMPTY".

Using the base:

1.   In idle mode, press ⬤ to view the redial list.
2.   Press ▲/▼ to browse the redial list.
3.   Pick up the corded handset or press **SPEAKER** ◀) to dial to the selected redial number.

NOTE:

If there are no numbers in the redial list, the display will show "**EMPTY**".

4.10.2   Store a Redial Number into the Phonebook

Using a handset:

Alternatively, you can switch the TAM on or off using the base menu.

1.   Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2.   Press **MENU/OK** and ▲/▼ to go to **TAM ON/OFF**.
3.   Press **MENU/OK** and ▲/▼ to select **ON** or **OFF**.
4.   Press **MENU/OK** to confirm.

17.2 Play Messages on TAM

If you have new messages, the display will show e.g. 02/05 MSGS, which means you have 2 new message out of total 5 messages. New messages are played first, and then are saved as old messages, until they are deleted. Old messages are played again after all new messages are played completely.

Using the handset:

1. Press 🔲 and ▲/▼ to select **ANS. SYS**.
2. Press 🔲 to show **PLAYBACK**.
3. Press 🔲 again to start message playback and the screen displays the date of the message received.
4. During message playback, press ▲/▼ to adjust the message playback volume respectively.

NOTE:

After new message is played, the new message will be saved as an old message automatically unless it is deleted.

5. Press 🔲 and ▲/▼ to select **STOP**, **FORWARD**, **PREVIOUS, SLOW ON** or **DELETE** to perform the following functions during message playback.

   • **STOP:** Stop the current message playback and return to the ANS. MACHINE menu.
   • **FORWARD:** Skip to play the next message. The date information of the next message will display if there is next message.
   • **SLOW ON:** to reduce the speed of the playback
   • **PREVIOUS:** Skip to repeat playing the current message from the beginning. The date information of the current message will display.
   • **DELETE:** Delete the current message and the next message will be played.

6. Press 🔲 to confirm the setting.

NOTE:

Alternatively, you can use the following shortcut keys to control different operation during message playback.

- Press **5** to stop message playback.
- Press **4** to skip to repeat playing the current message from the beginning. Press **4** twice to skip backward to the previous message.
- Press **6** to skip to play next message.
- Press **2** to delete the current message playback.
- Press ▲/▼ to adjust the playback volume.
- Press ◀) to turn the speakerphone on or off.

Using the base direct key:

In idle:
1. Press **PLAY/STOP** to listen to messages and memos.
2. Press **PLAY/STOP** if you want to stop the playback.
3. Press ◀◀ once if you want to repeat the current message from the beginning, or press twice to skip back to the previous message during message playback.
4. Press ▶▶ if you want to skip forward to the next message during message playback.
5. Press **DELETE** if you want to delete the current message being played.
6. Press **SLOW** to reduce the speed of the playback

Using the base menu:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** to show **PLAYBACK**.
3. Press **MENU/OK** to start playing back the messages from speakerphone.

17.3 Delete all Messages on TAM

Using the handset menu:
1. Press 🔘 and ▲/▼ to select **ANS. SYS**.
2. Press 🔘 and ▲/▼ to select **DEL OLD**
3. Press 🔘 and the display shows CONFIRM? .
4. Press 🔘 to confirm delete all old messages.

Using the base menu:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **DEL OLD**.
3. Press **MENU/OK**. and the display shows CONFIRM?
4. Press **MENU/OK** to confirm delete all old messages.

Using the base direct key:
Press and hold **DELETE** to delete all the old messages.

NOTE:
You cannot delete new messages, so you will have to play them before trying to delete.

17.4   Record Memos on TAM

You can record your memo message for another user. When you record a memo, the message counter will increase by one and the message can be played in the same way as answering machine messages. Memo recording can still function even when the answering machine is turned off.

Using a handset:

1. Press ⑤ and ▲/▼ to select **ANS. SYS**.
2. Press ⑤ and ▲/▼ to select **MEMO**.
3. Press ⑤ to start memo recording and "RECORDING" will be displayed.
4. Press ⑤ to stop memo recording and save the memo.

    OR

    Press **CANCEL/MUTE** ⑤ to stop memo recording without saving and go back to TAM menu.

Using the base:

1. Press **MENU/OK** and ▲/▼ to select **ANS SYS**.
2. Press **MENU/OK** and ▲/▼ to select **MEMO**.
3. Press **MENU/OK** to start recording the memo, and "RECORDING" is shown on the display.
4. Press **MENU/OK** to save and end your memo recording. The new memo will then play back automatically. Let it play to the end or press **MENU/OK** again to stop the playback. Or press *Int*/⊠/**C** at any time to stop the memo without saving it.

17.5   Answering Machine Settings

17.5.1   Set the talking TAM Language

You can choose the voice prompt language of the answering machine from a total of 4 languages. (English, French, Dutch and German)

Using a handset:

1. Press ⬛ and ▲/▼ to select **ANS. SYS**
2. Press ⬛ and ▲/▼ to select **SET TAM**
3. Press ⬛ and ▲/▼ to select **TAM LANG**.
4. Press ⬛ and ▲/▼ to select the desired voice prompt language for the answering machine, talking language and SOS message.
5. Press ⬛ to confirm

Using the base:

1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **TAM LANG**.
4. Press **MENU/OK** and ▲/▼ to select the desired voice prompt language for the answering machine, talking language and SOS message.
5. Press **MENU/OK** to confirm

17.5.2   Turn On or Off the Base Screening

You can select to turn on or off the call screening on base. When the answering machine is set to ON and when there is an incoming message, the base will start call screening automatically after the preset numbers of rings of answer delay.

Using a handset:

1. Press ⬛ and ▲/▼ to select **ANS. SYS**.
2. Press ⬛ and ▲/▼ to select **SET TAM**.
3. Press ⬛ and ▲/▼ to select **CALLSCREEN**.
4. Press ⬛ and ▲/▼ to select **ON** or **OFF**.
5. Press ⬛ to confirm.

Using the base:

1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **CALLSCREEN**.
4. Press **MENU/OK** and ▲/▼ to select **ON** or **OFF**.
5. Press **MENU/OK** to confirm.

17.5.3 Record your Outgoing Message (OGM)

You can record your own OGM for ANS & REC mode. When you record your own OGM, it will be used when the answering machine answers the call. If your personalized OGM is deleted, the pre-set OGM will be restored automatically.

Using a handset:

1. Press 🔊 and ▲/▼ to select **ANS. SYS**.
2. Press 🔊 and ▲/▼ to select **SET TAM**.
3. Press 🔊 and ▲/▼ to select **TAM MSG**.
4. Press 🔊 and ▲/▼ to select **RECORD**.
5. Press 🔊 to start recording your personalized OGM and "RECORDING" will be displayed on the screen.
6. Press 🔊 to stop and save your personalized OGM. Your newly saved OGM will play automatically. Alternatively, press **CANCEL/MUTE** 🔊 to return to previous screen without saving the personalized OGM.

Using the base:

1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **TAM MSG**.
4. Press **MENU/OK** and ▲/▼ to select **RECORD.**
5. Press **MENU/OK** to start recording your personalized OGM and "RECORDING" is displayed on the screen.
6. Press **MENU/OK** to stop and save your personalized OGM. Your new saved OGM will playback automatically. Alternatively, press *Int*/🖂/**C** to return to previous screen without saving the personalized OGM.

17.5.4   Playback the Outgoing Message (OGM)

Using a handset:
1. Press ☎ and ▲/▼ to select **ANS. SYS**.
2. Press ☎ and ▲/▼ to select **SET TAM**.
3. Press ☎ and ▲/▼ to select **TAM MSG**.
4. Press ☎ and ▲/▼ to select **PLAY**.
5. Press ☎ to play your personalized OGM (if you have recorded a personalized OGM before) and "PLAYING ANNC" will be displayed on the screen.
6. Press ☎ to stop the OGM playback and return to the previous menu.

NOTE:

If a personalized OGM is not recorded before, the pre-set OGM will be played.

Using the base direct key:

Press ◀◀ briefly to listen to the current OGM.

Using the base menu:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **TAM MSG**.
4. Press **MENU/OK** and ▲/▼ to select **PLAY**.
5. Press **MENU/OK** to playback your personalized OGM (if you have recorded a personalized OGM before) and "PLAYING ANNC" is displayed on the screen.
6. Press *Int*/⊠/C to stop the OGM playback and return to the previous menu.

NOTE:

If a personalized OGM is not recorded before, the pre-set OGM will be played.

17.5.5   Delete a Personalized OGM (SET OGM to DEFAULT)

Using a handset:
1. Repeat Steps 1 to 3 in the section 17.5.3.
2. Press (☎) and ▲/▼ to select **DELETE**.
3. Press (☎) to delete your personalized OGM and return to previous menu and the pre-set OGM is restored automatically.

NOTE:
If pre-set OGM is playing, you are not allowed to delete the pre-set OGM.

Using the base:
1. Repeat Steps 1 to 3 in the section 17.5.3.
2. Press **MENU/OK** and ▲/▼ to select **DELETE**.
3. Press **MENU/OK** to confirm.

17.5.6   Set the Answer Delay

You can set the number of rings before the answering machine answers and starts playing your OGM. You can set the answering machine to answer after two to ten rings or TIME SAVER.

The TIME SAVER function answers calls after 6 ring signals, until the first new message has been registered - then the answering machine switches to answering after approximately 2 signals. This is useful when using remote access; if you call up the answering machine and there is no reply after four rings that means there are no messages recorded and you can hang up before you are charged for the call.

Using a handset:
1. Press (☎) and ▲/▼ to select **ANS. SYS**.
2. Press (☎) and ▲/▼ to select **SET TAM**
3. Press (☎) and ▲/▼ to select **ANSW DELAY** (Available options: **2 RINGS, 4 RINGS, 6 RINGS, 8 RINGS, 10 RINGS** or **TALL SAVE**).
4. Press (☎) and ▲/▼ to select your desired answer delay.
5. Press (☎) to confirm.

Using the base:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **ANS DELAY**.
4. Scroll **MENU/OK** and ▲/▼ to select the desired answer delay.
5. Press **MENU/OK** to confirm.

ANSWERING MACHINE

17.5.7   Set the Recording Time of Incoming Message

You can set the maximum length of the recording time of the incoming messages.

Using a handset:
1. Press 📟 and ▲/▼ to select **ANS. SYS**.
2. Press 📟 and ▲/▼ to select **SET TAM**.
3. Press 📟 and ▲/▼ to select **REC TIME**.
4. Press 📟 and ▲/▼ to select your desired recording time (Available options:
   60S, 120S, 180S, or **UNLIMITED**).
5. Press 📟 to confirm.

Using the base:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **REC TIME**.
4. Press **MENU/OK** and ▲/▼ to select your desired recording time.
5. Press **MENU/OK** to confirm.

17.5.8   Activate Remote Access

Your phone lets you check your messages, or otherwise operate your answering machine, by calling the answering machine when you are away from home by entering a 4-digit remote access PIN on a tone-dialing phone. Use the 4-digit remote access PIN code to prevent other people from unauthorized access of your answering machine.

17.5.8.1   Change the 4-Digit Remote Access PIN

Using a handset:
1. Press 📟 and ▲/▼ to select **ANS. SYS**.
2. Press 📟 and ▲/▼ to select **SET TAM**.
3. Press 📟 and ▲/▼ to select **CHANGE PIN**.
4. Press 📟 and enter your new code pin
5. Press 📟 to confirm.

Using the base:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **CHANGE PIN**.
4. Press **MENU/OK** and enter your new code pin
5. Press **MENU/OK** to confirm.

17.5.8.2 Activate or Deactivate the Remote access

Using a handset:
1. Press **MENU/OK** 🔲 and ▲/▼ to select **ANS. SYS**.
2. Press 🔲 and ▲/▼ to select **SET TAM**.
3. Press 🔲 and ▲/▼ to select **REMOTE ACC**.
4. Press 🔲 and ▲/▼ to select **ON** or **OFF** to turn on or off the remote access respectively.
5. Press 🔲 to confirm.

Using the base:
1. Press **MENU/OK** and ▲/▼ to select **ANS. SYS**.
2. Press **MENU/OK** and ▲/▼ to select **SET TAM**.
3. Press **MENU/OK** and ▲/▼ to select **REMOTE ACC**.
4. Press **MENU/OK** and ▲/▼ to select **ON** or **OFF** to turn on or off the remote access respectively.
5. Press **MENU/OK** to confirm.

17.5.9   Function message alert
When you have a new message, you can hear a beep every 10 seconds.
If you want deactivate this beep, follow the procedure.
Using the handset:
1. Press 🔲, and ▼/▲ to select **ANS.SYS**.
2. Press 🔲, and ▼/▲ to show **SET TAM**.
3. Press 🔲 and ▼/▲ to select **MSG ALERT**.
4. Press 🔲 and ▼/▲ to select **OFF**.
5. Press 🔲 to confirm.

17.5.10   Remote Operations

If you are away from your home, you can call your answering machine to switch on or off the answering machine and listen to your messages remotely using another tone-dialing phone.

1.   Place a call from a tone-dialing phone.
2.   When the answering machine answers the call and starts playing OGM, press ✷.
3.   Enter the 4-digit Remote Access PIN (default PIN is 0000).
4.   Press the following keys to carry out your desired function.

Keys	Functions	
	While message is not playing	**While message is playing**
2		Delete the current message playback
4		Repeat playing the current message from the beginning. Press twice to skip backward to the previous message.
5	Play the message	
6		Skip forward to play the next message
7	Turn on the answering machine	
8		Stop the current message playback
9	Turn off the answering machine	
*	Enter the 4-digit remote access PIN	

NOTE:

•   When your answering machine memory is full and the answer mode is in ANS & RECORD, the answer mode will change to ANSWER ONLY automatically. It will change to ANS & RECORD mode automatically after some messages have been deleted.

18 TROUBLESHOOTING

If you have difficulty with your phone, please try the suggestions listed below.

Problem	Solutions
My telephone does not work at all.	• Make sure the battery is installed and charged correctly. • For optimum daily performance, return the handset to the telephone base after use. • Make sure the power adapter is securely plugged into an outlet not controlled by a wall switch. • Make sure the telephone line cord is plugged firmly into the telephone base and the telephone wall jack. • Unplug the electrical power to the telephone base. Wait for approximately 15 seconds, then plug it back in. Allow up to one minute for the handset and telephone base to synchronize. • Remove and re-insert the batteries. If that still does not work, it might be necessary to purchase some new batteries. • Disconnect the telephone base from the telephone wall jack and plug in a working telephone. If the other telephone does not work, the problem is probably in the wiring or the telephone service. Call your telephone service provider.
Low battery shows on screen.	• Place the handset in the telephone base for recharging. • Remove and re-install the battery and use it until fully depleted, then recharge the handset in the telephone base. • If the above measures do not solve the problem, replace the battery.
The battery do not charge in the handset or the handset battery do not accept charge.	• Make sure the handset is placed in the telephone base correctly. • Remove and reinstall the battery, then charge for up to 16 hours. • Purchase a new battery.

There is interference during a telephone conversation. My calls fade out when I am using the handset.	• The handset may be out of range. Move it closer to the telephone base.
	• If you subscribe to high-speed Internet service (digital subscriber line - DSL) through your telephone line, you must install a DSL filter between the telephone base and the telephone wall jack. The filter prevents noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.
	• Appliances or other cordless telephones plugged into the same circuit as the telephone base can cause interference
	• Try moving the appliance or telephone base to another outlet.
	• Other electronic products may cause interference to your cordless telephone. Install your telephone as far away as possible from the following electronic devices: wireless routers, radios, radio towers, pager towers, cellular telephones, digital telephones, intercoms, room monitors, televisions, VCRs, personal computers, kitchen appliances, and other cordless telephones.
	• If your telephone is plugged in with a modem or a surge protector, plug the telephone (or modem/surge protector) into a different location. If this doesn't solve the problem, re-locate your telephone or modem farther apart from each other, or use a different surge protector.
	• The location of your telephone base can impact the performance of your cordless phone. For better reception, install the telephone base in a centralized location within your home or office, away from walls or other obstructions. In many environments, elevating the telephone base improves overall performance.
	• Disconnect the telephone base from the telephone wall jack and plug in a corded telephone. If calls are still not clear, the problem is probably in the wiring or telephone service.
	• Contact your telephone service provider (charges might apply).
	• If the other telephones in your home are having the same problem, the problem is in the wiring or telephone service.
	• Contact your telephone service provider (charges may apply).

Common cure for electronic equipment.	If the telephone is not responding normally, put the handset in the telephone base. If it does not respond, try the following (in the order listed):

- Disconnect the power to the telephone base.
- Disconnect the battery on the handset.
- Wait a few minutes before connecting power to the telephone base.
- Re-install the battery and place the handset in the telephone base.
- Wait for the handset to synchronize with the telephone base.

This telephone is not equipped with a grounding function! Therefore, some of the functions may be limited when used in PBX systems.

Please contact the technical support of the network provider for further information.

20 CARE AND MAINTENANCE INSTRUCTIONS

Take care of your telephone

- Your cordless telephone contains sophisticated electronic parts, so you must treat it with care.
- Avoid rough treatment.
- Place the handset down gently.
- Save the original packing materials to protect your telephone if you ever need to ship it.

Avoid water

- You can damage your telephone if it gets wet. Do not use the handset in the rain, or handle it with wet hand. Do not install the telephone base near a sink, bathtub or shower.

Electrical storms

- Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electric appliances during storms.

Cleaning your telephone

- Your telephone has a durable plastic casing that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or a mild soap.
- Do not use excess water or cleaning solvents of any kind.

NOTE

Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If the telephone base should fall into water, **DO NOT RETRIEVE IT UNTIL YOU UNPLUG THE POWER CORD AND TELEPHONE LINE CORDS FROM THE WALL.** Then pull the unit out by the unplugged cords.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.

DISPOSE OF USED BATTERY ACCORDING TO THE INSTRUCTIONS.

21 GUARANTEE

From the moment your Geemarc product Ampli DECT Combi 595 is purchased, Geemarc guarantee it for the period of two years. During this time, all repairs or replacements (at our discretion) are free of charge. Should you experience a problem then contact our help line or visit our website at **www.geemarc.com**.

The guarantee does not cover accidents, negligence or breakages to any parts. The product must not be tampered with or taken apart by anyone who is not an authorized Geemarc representative.

The Geemarc guarantee in no way limits your legal rights.
